March 2, 2016

Dear University of Hartford Parents and Students:

For the 2016-17 academic year, undergraduate tuition, fees, and room and board will increase by 3.49 percent overall. Please click here to see a chart with a breakdown of costs for next year.

We have been able to hold down the annual increase in tuition, fees, and room and board through a concerted, multiyear effort to cut costs, by keeping our administrative expenses as low as possible and investing in new ways of reducing fixed costs, such as energy.

Our faculty and staff are really at the heart of every student’s experience. In order to prepare students for today’s rapidly changing world, we have created a balanced approach that combines disciplinary training and real-world experience with the lifelong skills of analysis, critical thinking, and clear writing. And we are focusing on career preparation designed to provide every student, regardless of major, with the skills and experience to work in the field of his or her choice upon graduation.

The qualities at the heart of a University of Hartford education remain our hallmark—personal attention, close relationships between students and faculty, and a belief that challenge, support, and mentoring build a foundation for lifelong success.

Thank you for being an important part of the University of Hartford community.

Sincerely,

Walter Harrison
President
