In light of the recent increase of overheating incidents involving Hot Cars, Public Safety and members of the campus community would like everyone to join them in an effort to be Vigilant. We would like everyone to work together to prevent further incidents of Children & Pets left unattended inside locked vehicles with no ventilation. Incidents such as this can be dangerous at any given time, but especially during the high temperatures we have been confronted with. Please remember, If you See Something Say Something, call Public Safety or if off campus your local Police Department.
