WOMEN IN ENGINEERING
BECOME MAKERS

We are recruiting women currently pursuing engineering degrees, or high school students interested in engineering as a major, who would like to gain hands-on experience in making, tinkering, teaming, and design thinking!

Apply to be a part of a team of leaders who work together to build their technical engineering skills through an all virtual 6-session series targeted towards:

1. Working Together on Design Teams
2. Rapid Prototyping to Communicate Design Ideas
3. Ideating in Virtual Teams
4. CAD and 3D Printing
5. Build your Own Microscope & Look at Your Cells
6. Intro to Tissue Engineering & Bioreactor Design

Dates: Every Tuesday (6 nights) 5 - 8 pm: 4/6/21 – 5/11/21

Are you a student interested in, or already pursuing a degree in engineering?

In this virtual workshop series, you will work together with your design team of supportive women engineers to learn how to build functional prototypes in order to hone your technical design skills. Teams will have high school and undergraduate students, professionals and design coaches to give you a chance to network and learn together!
