

Using Blackboard's Glossary Tool

Do you have a list of important terms for your course that you want your students to remember? You can create a customized glossary in Blackboard that students can access through the *Tools* menu. Here's how:

Go to the **Control Panel** → **Course Tools** → **Glossary**. Once you have added terms, they are automatically listed in alphabetically order, as shown below.

- Open up *Microsoft Excel*.
- In the first column, type the list of terms - one term per field.
- In the second column, type the definition for each term – again, one definition per field.
- **Do not** type any headers for the columns. Blackboard will recognize them automatically.
- Click on the disk icon to save the file... but don't save right away... instead, in the window that opens, scroll through the options under *Save as type* and highlight “Text (Tab-delimited) (*.txt)”.

Save As Text (Tab delimited) (*.txt)

- Click **Save**. Say ‘OK’ and ‘Yes’ to the alert messages.
- Upload the file into Blackboard (see above). Terms are listed alphabetically.
